yadavsantu

Profile

Computer Engineering graduate from **Pokhara University** with hands-on experience building full-stack web applications using **React, Node.js, Express.js**, and **MongoDB or MySQL**. Built authenticated, role-based systems, REST APIs, and third-party integrations. Delivered a freelance client project deployed on cPanel, and completed a CNN-based attendance system as a final-year capstone.

Experience

Janakpur Bolts Army — **Janakpur**
Freelance Full-Stack Developer — *Jul 2026 – Present*

- Built a dynamic, mobile-responsive web portal for a cricket fan club to manage events, memberships, and a Go Green Campaign tracker.
- Developed an admin panel for managing site content and advertisement placements.
- Built the frontend in **React** with **Tailwind CSS** and backend REST APIs in **Node.js** and **Express.js**, with **MySQL** as the database.
- Deployed on cPanel; the database handles hundreds of members reliably.
- Live at boltsarmy.com.

Projects

Pokhara University
Advanced Attendance System (Final-Year Capstone) — *2025*

- Built secure, role-based dashboards for **Admin, Teacher, and Student** users using **React** and **Tailwind CSS**.
- Developed RESTful APIs for authentication, teacher and classroom management, and attendance tracking with **Node.js** and **Express.js**, structured using **MVC** architecture.
- Integrated a custom-trained **CNN** model for facial detection and recognition, restricting access to institution-issued credentials only. Received an **A grade**.
- **Live Demo:** sumitra-lms.vercel.app

MEVN Stack
Smart Invoice — *2025*

- Built responsive invoice creation and management interfaces.
- Implemented invoice logic and PDF generation with **jsPDF**.
- Migrated data storage to **MongoDB Atlas** for cloud deployment.
- **Project Highlights:** View LinkedIn Post

Hackathon Project
Real-Time Accident Reporting System — *2025*

- Built during a college hackathon to help bystanders report accidents quickly.
- Used **Google Maps APIs** (Maps, Places, Distance Matrix) to rank the nearest hospitals, ambulances, and police stations.
- Sent real-time location alerts to emergency services through the **Twilio WhatsApp API**.
- **Project Highlights:** View LinkedIn Post

Personal Project
CEE Rank Predictor — *In progress*

- Trained a custom machine learning model on historical Common Entrance Examination data to predict candidate ranks, with a web interface for results.

Technical Skills

Web: React.js, Node.js, Express.js, Vue.js, Tailwind CSS, HTML, CSS, RESTful APIs, FastAPI

Databases: MySQL, MongoDB (Mongoose ODM), PostgreSQL, SQL

Languages: JavaScript, Python, C, C++, Kotlin (basic)

Tools: Git/GitHub, MVC architecture, UX/UI design, integration of AI/ML models into web apps

Education

Pokhara University **Nepal**

B.E. Computer Engineering, GPA: 3.32/4.0 *[2022 Feb] – [2026 Mar]*

Fully funded University Scholarship, Pokhara University (2078 intake).

Pokhara University Master's Scholarship Examination **Nepal**

MSc Computer Science Entrance, Ranked 34th *March 2026*

Qualified among 63 successful candidates out of hundreds of applicants (score 80/150; 28th among public-sector candidates).

Achievements

ISTN Hackathon 2025 — Winner (Team Lead): First place in the 24-hour hackathon organized by IT Skills Training Nepal. Researched and developed the concept over 2–3 months beforehand, then led the team to execute efficiently during the event.

TechSprint Hackathon 2026 — Team Lead: Led the team through the 48-hour national event (January 17–19, 2026) at Nepal Engineering College, organized by CoESS.

JunctionX Kathmandu 2026 — Team Lead: 30-hour hackathon (May 29–31, 2026) organized by SUMS Nepal and COGKNIT with the Embassy of Finland, as part of Hackjunction, Finland.

Ambition Hack Fest 2025 — Team Lead: 48-hour national-level hackathon(12 ASHAR -14 ASHAR 2082) organized by Ambition College, Mid-Baneshwor.

The Cosmos Hackathon — Mentor: Mentored participants at an event organized by ICT Club, CCMT, Pokhara University.
